PROFILE

Backend Developer with 3 years' experience in Python/Flask and Node.js/Express, specializing in scalable REST APIs, real-time data pipelines, and cloud deployments. Technical Lead of RAIN-INN's core team — mentoring students in building and deploying backend services on AWS.

EDUCATION

IBM DevOps and Software Engineering

Coursera

05/2025 – present

B.Eng. Computer Engineering

Olabisi onabanjo University

01/2022 – Present

Diploma in Software Engineering

Alx school

2021 – 2022

A 12-month Software Engineering Programme for the Digital Transformation is the Next Industrial Revolution

SKILLS

Programming Languages

- Python: Advanced proficiency in scripting, automation, web development(Flask/Django), data analysis, and machine learning applications.
- JavaScript/TypeScript: Full-stack development with Node.js for server-side scripting and modern frontend frameworks.
- C: System-level programming and performance-critical applications.
- SQL: Database design, complex queries, optimization, and data analysis.

Web Development & APIs

- Backend: NodeJS, ExpressJS, Nestjs, Flask, Django, RESTful API development and microservices architecture
- Database: MySQL, NoSQL (MongoDB) for scalable data storage and retrieval
- Cloud & DevOps: AWS EC2, deployment automation, Nginx reverse proxy configuration

Development Tools

- Version Control: Git for collaborative development and project management
- DevOps: Puppet, Python Fabric for configuration management and automated deployment

PROJECTS

Casino Games Simulator with Strategy Analysis (Acemate)

Built a simulation application for Roulette, Craps and Blackjack featuring probability calculation and statistical analysis of player strategies.

10/2024 – 01/2025

AirBnB Clone

Built a scalble online marketplace platform with user authentication, property listings, and booking management. Implemented search algorithms, RESTful APIs, and datababase optimization for high traffic scenerios.

05/2022 – 11/2022
